

JOB OFFER

Position in the project:	MSc studies in metabolomics.
Scientific discipline:	Metabolomics, Mass Spectrometry,
Job type (employment contract/stipend):	stipend
Number of job offers:	1
Remuneration/stipend amount/month (*X0 000 PLN of full remuneration cost, i.e. expected net salary at X 000 PLN*):	1 000 PLN netto
Position starts on:	01.10.2017
Maximum period of contract/stipend agreement:	24 months.
Institution:	Institute of Biochemistry and Biophysics - PAS
Project leader:	Prof. hab. Dr. Michal Dadlez
Project title:	Mass Spectrometry of Biopharmaceuticals - improved methodologies for qualitative, quantitative and structural characterization of drugs, proteinaceous drug targets and diagnostic molecules. <i>Project is carried out within the Team Tech Core Facility programme of the Foundation for Polish Science</i>
Project description:	Mass Spectrometry (MS) expands into almost every area that requires qualitative and quantitative analysis of small molecules, including clinical applications. Its advantages include unsurpassed specificity, sensitivity better than most other analytical techniques, and ability to multiplex the analysis of many compounds in one analytical run. Since 2001 MS Lab IBB serves as a core MS laboratory for the community of biomedical sciences, implementing a variety of proteomic/metabolomic analyses for research groups from >70 institutions worldwide, both from academia and biopharma industry. It also provides immunosuppressive drug monitoring service for Polish transplant patients. We collaborate with numerous research groups from Poland and abroad, work out new data analysis tools and train students. Present project aims at improvements in analytical capabilities of the Lab and implementation of new procedures that will increase the scope of Lab activities or increase the results quality. We also plan enhanced cooperation, within the framework of mutual work support with pharmaceutical industry.
Key responsibilities include:	<ol style="list-style-type: none"> 1. Conducting metabolomics experiments, including analysis of drugs and metabolites. In example: setting new quantifying protocol of a drug. 2. Preparing reagents, buffers, etc. 3. Preparing calibration curve. 4. Taking care of equipment . 5. Database management.
Profile of candidates/requirements:	<ol style="list-style-type: none"> 1. BSc of relevant disciplines. 2. Knowledge of chemical extraction methods. 3. Experience in work with human or animal material. 4. At least B2 level English certificate. 5. Knowledge of MassLynx software, experience in operating mass spectrometer would be appreciated.

Required documents:	1. Curriculum Vitae and certificate list.
We offer:	Stipend for 24 months.
Please submit the following documents to:	m.glowacka@ibb.waw.pl
Application deadline:	25.10.2017
