

## JOB OFFER

Position in the project:	PhD student in Sturctural Proteomics
Scientific discipline:	Proteomics, Mass Spectrometry, Sturctural Proteomics
Job type (employment contract/stipend):	stipend
Number of job offers:	2
Remuneration/stipend amount/month (*X0 000 PLN of full remuneration cost, i.e. expected net salary at X 000 PLN*):	3 500 PLN netto
Position starts on:	01.10.2017
Maximum period of contract/stipend agreement:	36 months (plus possible extension for another 24 months after positive assessment of grant progress)
Institution:	Institute of Biochemistry and Biophysics - PAS
Project leader:	Prof. hab. Dr. Michal Dadlez
Project title:	<b>Mass Spectrometry of Biopharmaceuticals - improved methodologies for qualitative, quantitative and structural characterization of drugs, proteinaceous drug targets and diagnostic molecules.</b>  <i>Project is carried out within the Team Tech Core Facility programme of the Foundation for Polish Science</i>
Project description:	Mass Spectrometry (MS) expands into almost every area that requires qualitative and quantitative analysis of small molecules, including clinical applications. Its advantages include unsurpassed specificity, sensitivity better than most other analytical techniques, and ability to multiplex the analysis of many compounds in one analytical run. Since 2001 MS Lab IBB serves as a core MS laboratory for the community of biomedical sciences, implementing a variety of proteomic/metabolomic analyses for research groups from >70 institutions worldwide, both from academia and biopharma industry. It also provides immunosuppressive drug monitoring service for Polish transplant patients. We collaborate with numerous research groups from Poland and abroad, work out new data analysis tools and train students. Present project aims at improvements in analytical capabilities of the Lab and implementation of new procedures that will increase the scope of Lab activities or increase the results quality. We also plan enhanced cooperation, within the framework of mutual work support with pharmaceutical industry.
Key responsibilities include:	<ol style="list-style-type: none"> <li>1. HDX experiments planning, carrying and data analysis</li> <li>2. HDX Synapt spectrometers maintenance</li> <li>3. Conducting HDX experiments to answer biologically relevant questions.</li> <li>4. Conducting of ongoing and future HDX projects</li> <li>5. Cooperation with other research groups in structural projects</li> </ol>
Profile of candidates/requirements:	<ol style="list-style-type: none"> <li>1. At least 3 years' experience in scientific work in mass spectrometry laboratory.</li> <li>2. At least 3 years' experience in HDX experiments (planning, carrying and data analysis).</li> <li>3. Experience with using chemical cross linking coupled to MS method.</li> <li>4. Experience with using non MS-based method for investigating protein structure.</li> <li>5. Experience with protein expression and purification.</li> <li>6. MSc degree in biotechnology, biology or biochemistry.</li> </ol>

Required documents:	<ol style="list-style-type: none"> <li>1. Curriculum Vitae</li> <li>2. Diploma copy.</li> </ol>
We offer:	Stipend for 36 months (plus possible extension for another 24 months after positive assessment of grant progress).
Please submit the following documents to:	m.glowacka@ibb.waw.pl
Application deadline:	25.10.2017
